Our next page examines what type of losses occurred based on the Cyber threat event.

You have a few options here.

First, what loss occurred and was it confirmed, contained, exploited, etc. You can select one of those.

What information what compromised? And we could say classified material.

Was there a physical impact? You can select that say none.

If there was an asset type that was affected, you could select it here.

These can be added to the cart and the form willl zero out so you can add more if you'd like to, but we're going to continue from here
